

# TPCS Broadband

TPCS provide business class broadband services based on the BT MAX product range. Our broadband installations are managed and supported directly by us, so no queuing on premium rate telephone numbers.

We can provide firewalls either installed directly by our engineers or, if preferred, preconfigured firewalls can be provided for self-installation.

All our broadband services run at the maximum speed allowed by BT (currently up to 8Mb) at no extra cost.

## **Pricing:**

All prices exclude VAT

### **Setup Fees**
